

CATCH, CONTAIN AND WORK WITH CATTLE ANYWHERE

**FLYING
FARMER**

MIDGLEY MOBILE CATTLE HANDLING SYSTEMS*

Designed by a cattle farmer,
for cattle farmers.

Large Model:

Built for heavy duty use by contractors, estates and farms with larger herds or where cattle are grazed on unfenced pasture. Select the options you need for the job and tow with a tractor to site. No more chasing cattle, they come to you.

- Central feeder with one or two large pens to hold up to 80 cattle.
- Protected central walkway and clip-on extra height barriers give safe access to inspect ear tags etc.
- Top quality engineering and extra-strong galvanised construction for a long life and safe operation.
- Built in entrance and safety escape gates.
- Operate on its own or with existing crush or handling systems.
- Options include pen dividers, extra hurdles and pen to pen transfer gates, lights & brakes.
- Tried and tested across the UK.
- Interchangeable diagonal feed barriers or self-locking head yokes.

Smaller 4WD model also available.

*UK patent No:GB2469840

“I tried everywhere over several years to find a catching/containment system for my hire business that met all my needs, nothing did, so I developed one myself and now you can buy it.”

-Michael Midgley
